The Jacksons Victory Tour 1984 Tour Book *Version #2* (USA)

Official Victory Tour book sold at the USA concerts (after Kansas City) through mid-Summer, 1984. Numerous changes were made with this version which differ from the original version which was used for the Kansas City concerts. The easiest way to tell this one apart from the original version is via the back cover, with each one featuring a different portrait of MJ in the "black sweater". This version (as well as the third version) features a nearly full figured MJ portrait where the KC version is an alternate portrait with a close up of his face. The other major difference is the color of the pages, with this one having blue colored pages (where the KC pages were purple), and the fonts of the lettering and headings are different as well. Lastly, this one has the Victory album cover on the inside front cover, whereas the KC version had a blank internal cover page (with embossed printing on the cover). Presumably, the KC version was printed before the Victory album was out, or at least before the artwork was finalized.
